

TiVUS HD IPTV™

NEW SIGNIFICANT REVENUE

“This new [TiVUS HD IPTV™] platform of Internet-based video-on-demand will facilitate our exit from the traditional hotel video systems..., and, will also provide guests greater choice and control over what they watch,”

Jeff Flaherty, Marriott spokesman

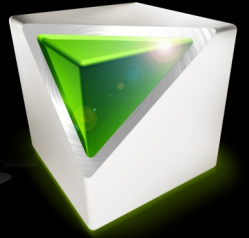

No one in the world except TiVUS provides the Hotel Industry with advertising revenue from their free-to-guest channel lineup. We share this advertising revenue with you using our ad-insertion technology. This is unique to the industry. Telephone and movie rentals have been steadily declining for more than a decade. TiVUS delivers an exciting new technology that, through its robust ad-revenue sharing arrangement, can potentially pay for itself. Even more exciting, for the first time in the industry, the in-room entertainment TV can significantly add to your bottom-line profits.

Our solution replicates what most of your guests have at home in their living rooms: a familiar remote, a familiar channel guide, easy internet connections, free-to-guest TV, game availability, shopping, premium channels, etc.

FREEDOM OF CHOICE

- Complete selection of free-to-guest TV
- Local channels plus flight schedules
- Choose the latest blockbuster movies
- Hotel solely CHOOSES its content
- No fees to ‘opt-out’ of adult content
